

# Software Developer Oracle-APEX

Information Technology | Portugal | Funchal

## Shaping the World with Sensor Solutions.

ams AG is a global leader in the design and manufacture of advanced sensor solutions. Leading manufacturers around the globe rely on ams' sensing know-how for advanced systems design. For ams, "Sensing is Life", and our passion is in creating the sensor solutions that make devices and technology smarter, safer, easier-to-use, and more eco-friendly.

### Job description/tasks:

- *We are looking for highly motivated IT professionals to join our young and dynamic in-house software development team.*
- *Design and develop highly stable and reliable solutions on our Oracle RDBMS-APEX platform.*
- *Provide assistance to our key users.*
- *The successful Java developer must have a focus on providing accurate and usable results in a timely manner.*

### Responsibilities:

- Design, implement, test and document solutions for our internal customers (interfaces, technical concepts for solutions, enhancements to existing solutions).
- Provide technical support during analysis of requirements (i.e., give proposals for solutions).
- Support analysis of problems/failures during the whole software life-cycle.
- Help develop and move forward the services of the software development team.
- Work on his/her own initiative and in teams, interacting with internal customers.

### Education/Experience:

- Technical University, University of Applied Sciences or appropriate qualification or experience.
- Several years of experience as Oracle developer (SQL, PLSQL, APEX)
- Experience with development of web applications (HTML5, JavaScript, CSS, XML, Web Services)
- Priority will be given to candidates with development experience in semiconductor environments.
